COVENTRY UNIVERSITY' S FORMULA STUDENT TEAM

2009 NEWSLETTER #1

Dear all,

Firstly we would like to take this opportunity to thank you again for your continuing support. Without it our ambition to produce a competitive car would not be possible.

We completed the main chassis manufacture in time for Autosport 2009 and were

pleased to have it in pride of place on our stand at the exhibition (*See left picture*). The exhibition gave us the opportunity to get some feedback on our chassis as well as look at some of the competition and investigate what technology was available to incorporate and develop into our car.

Progress of the car has leaped forward and we have something which is starting to resemble our race car. With this in mind we are still pushing hard to get the car ready for testing soon. With many of the team spending every available minute working away in the workshop, where they can still be found late on in the evenings.

The bodywork design team have also been hard at work too and have produced some fantastic final designs for the car. The designs incorporate our vivid orange team colour with an aggressive and stealthy look about it. Maybe it will scare the competition in July, we'll have to wait and see! (*See above right picture*).

The team have also taken delivery of their team wear which they are now wearing with pride. With the arrival of the team clothing we thought it was only right to have a new team photo. (*See left picture*). We will now be easy to spot when out and about.

We would just like to thank you again for your support and with the team hard at work to complete the project we look forward to updating you soon with our progress. We would also love to hear what you think so please feel free to get in touch.

Yours Sincerely
